

# Side Hanging Brackets

## IN BRIEF

Clemcorp have developed a range of side mounted “Fan Wings” for the complete range of Clemcorp Axial Fans. These rated hanging brackets provide an alternative suspension method from the traditional top-hanging fin. Utilising side mounting brackets permit the fan to be mounted much closer to the backs increasing clearances to underground traffic. Lowering the suspension point provides an easier access point for operators removing the need to reach outside of the hanging basket.

## KEY POINTS

- 1 Rated side mounted suspension brackets
- 2 Designed to allow fans to be mounted closer to the backs by lowering the suspension point
- 3 Dual suspension holes for hanging and winching
- 4 Allows operator to access suspension point while still in the man cage/basket
- 6 Supplied with grade 8.8 fasteners
- 7 A safer hanging method

## SPECIFICATIONS

DESCRIPTION	PRODUCT CODE	RATING
CC1400 Side Mounting Bracket	AP365	2.5t
