

VENTSIMTM

3D Mine Ventilation Simulation Software

2 Day Training Course

**Clemcorp Office, Landsdale
Perth, WA
May 10 -11, 2017**

Day 1: Ventilation Concepts, Design and Analysis

Day 2: Health, Safety and Air Quality Improvement

www.ventsim.com

Training Course Details

The Course will be presented by Ventsim™ Software Developer, **Mr Craig Stewart**. Craig is a mining engineer with over 22 years experience in underground mining, including 10 years as a senior mine manager.

This course will educate participants in fundamental ventilation design and improvement strategies. Using Ventsim™, course participants will model and simulate a wide variety of ventilation systems and scenarios. Participants will also learn how to **optimise existing ventilation systems**, in order to achieve considerable mine cost savings.

All participants will receive a **30 day license of the latest version of Ventsim™ PREMIUM** and example files for course work and post course exercises.

Participants are required to bring a suitable laptop.

"The interactive environment is perfect for this type of training."

"Great presenter!"

"A++, excellent course!"

Course Contents

Day 1 : Ventilation Concepts, Design and Analysis with Ventsim™ 4

- Rapid and detailed building of ventilation models
- Selecting fans and optimising airway sizes
- Creating cost efficient and safe ventilation designs

Day 2 : Health, Safety and Air Quality Improvement with Ventsim™ 4

- Introduction to thermodynamic heating and cooling design.
- Modelling and reducing DPM exposure
- Controlling recirculation
- Simulating gases, contaminants, dust and blasting fumes
- Introduction to fire and emergency simulation
