

Low Profile Silencers

IN BRIEF

Clemcorp offers a range of low profile Silencers to suit our fans, as well as other standard fan sizes and bolting patterns. Clemcorp silencers achieve a significant reduction in noise, using acoustic foam technology to reduce decibel levels as much as possible. Clemcorp low profile silencers are 35% lighter, have up to 200mm increased diameter clearance and retain virtually identical attenuation characteristics in comparison to the existing standard designs.

In situations where additional noise reduction is required Clemcorp also offers double length silencers and podded silencers for applications where maximum noise reduction is required due to proximity to workers or residences.

KEY POINTS

- 1 Low profile design reducing the chance of mobile plant strikes
- 2 Hydrophobic Closed Cell Acoustic Foam Insert, easy to replace and will not suffer performance degradation when wet
- 3 Fire Retardant and UV Resistant
- 4 Noise reduction of up to 5dB per standard length low profile silencer (Based on CC1400Mk4 90kW fan)

SPECIFICATIONS

DESCRIPTION	PRODUCT CODE	WEIGHT
CC610Mk1 Low Profile Silencer Standard Length	0610-036	54kg
CC760Mk1 Low Profile Silencer Standard Length	0762-016	97kg
CC925Mk1 Low Profile Silencer Standard Length	0925-044	115kg
CC1070Mk2 Low Profile Silencer Standard Length	1070-062	135kg
CC1254Mk3 Low Profile Silencer Standard Length	1254-146	155kg
CC1400Mk4 Low Profile Silencer Standard Length	1400-280	182kg
CC1600Mk2 Low Profile Silencer Standard Length	1600-162	266kg
CC1800Mk1 Low Profile Silencer Standard Length	1800-029	220kg
CC1400Mk4 Podded Silencer Extended Length	1400-137	321kg
