

Automated Louvers

IN BRIEF

The Clemcorp range of louvers are designed for demanding underground mining applications. Automated louvers enable operators to automate ventilation flows on levels without utilising manual drop board regulators. Individual blades can be locked to present locations via a simple disconnect system. Multiple Louvers can be fitted to cover a complete range of airflow duties.

KEY POINTS

- 1 Automation Enabled Mining Ventilation Louver
- 2 Maintenance Free Design
- 3 Flow Rates up to 0m³/s-100m³/s Per Louver Panel
- 4 HD Galvanised Finish
- 5 Low Leakage Labyrinth Seal Blades
- 6 ISO F10 / F12 Interface for Linear or Rotary Actuator
- 7 Range of Actuator Options

SPECIFICATIONS

DESCRIPTION	PRODUCT CODE	DIMENSIONS L x W x H	OPEN AREA	WEIGHT
Standard Louver	AP-521	1400mm x 450mm x 1810mm	2m ²	550kg
Extended Height Louver	AP-577	1400mm x 450mm x 2700mm	3m ²	850kg
