Safety First

WORLD'S ONLY FAIL-SAFE SIGN

All other signs will display old data on loss of mine communications.
This is not safe and can lead to lost injury claims or unsafe working conditions.

Underground mining applications

Communicate working conditions in real time

- Airflow rate
- Gas concentrations
- Safety Messages

More time at the Face.

Underground mining applications

Ventilation on Demand applications

- Airflow rate
- Available HP notifications

More time at the Face.

Underground mining applications

Ventilation on Demand applications

- Large – Bright – Tri-colour
- Reliable – Safe – Robust

Increase Safety and Productivity

More time at the Face.

Surface mining applications

Blast clearance Optimization

- Shaft collar – surface
- Airflow rate
- Gas conditions

More time at the Face.

Surface mining applications

Portal Entry

- Safety Messages
- Environmental conditions

More time at the Face.

Additional applications

U/G Level Entry
Ventilation air conditions
Available level entry HP

U/G Level Entry
Real time tag board
Tagging system accessory

More time at the Face.

Additional applications

Collar House
Production figures
Cage Co-ordinates

Ore Pass Safety
Distance from grizzly
Ore pass inventory

Flexible communication connectivity

- Choice of information delivery to each line
 - Modbus TCP/IP or Modbus RS485 from remote PLC/DCS/SCADA/HMI
 - Text input by Webpage manual entry
 - HTTP post from other software applications
- Ethernet copper or fiber optic (single or multi-mode)
- Leaky feeder
- 2" high SuperBrite® Tri-colour LED characters
- Flashing or solid state characters
- Fail-safe on loss of communications

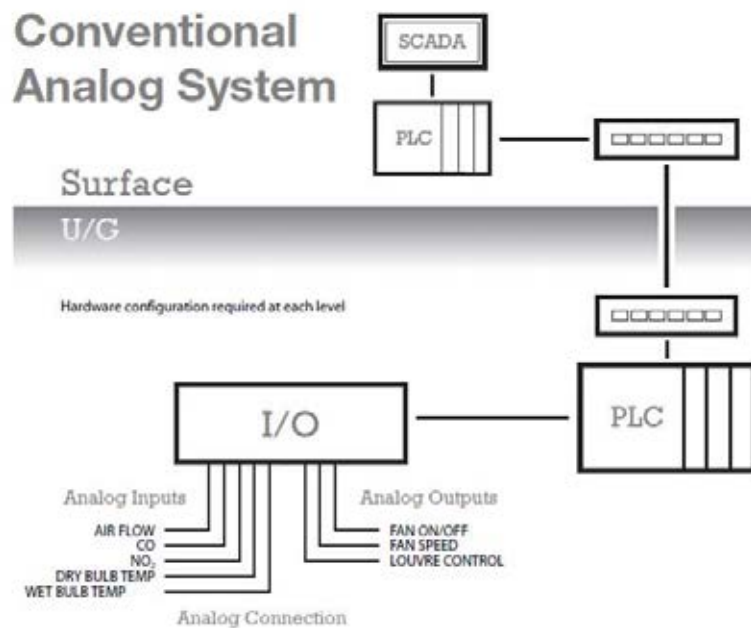

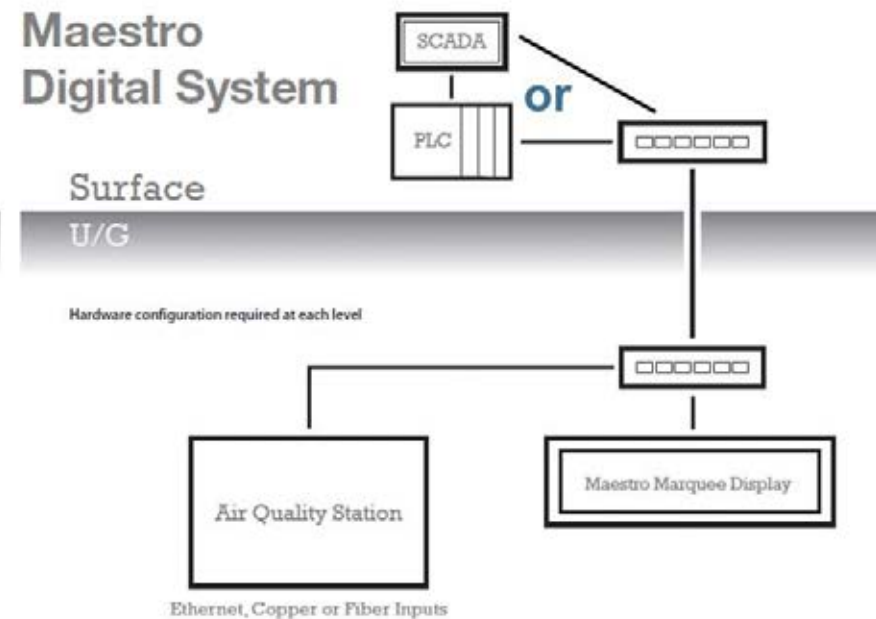

More time at the Face.

Easy integration into existing infrastructure

Conventional Analog System

Maestro Digital System

User comments

“This marquee display has many 'plug and play' feature I have not seen in other displays. For example, it can be part of an automation solution (e.g Ventilation on Demand), while simultaneously being used as an operations messaging system using the web browser interface. A welcome and innovative product.”

Erik Bartsch - Operations Technology Leader at Xstrata Nickel
November 18, 2012
